

Araldite®

professional adhesives

Araldite® Crystal 2x15ml Tube

A strong, long lasting solvent-free adhesive which is water resistant and can be painted or sanded. Perfect for jobs which require invisible joins or high transparency.

Important

Bonds glass, jewellery, ceramics, china porcelain and also many other materials (metal, wood, masonry, dry concrete, chipboard, leather, cardboard, fabric, rubber ...). Make sure surfaces are clean and free from dust, corrosion, dirt and grease.

For optimum bonding of wood and metal, slightly roughen surfaces with sandpaper and degrease metals with a suitable solvent. During assembly apply light pressure to the joint until set (clamps, tape) around 20 minutes. Allow 3 hours to attain full strength before rough handling or sanding.

How to apply

Araldite® Crystal is a strong 2-component epoxy adhesive with fast setting. Dries crystal clear. Parts repositionable for 4 minutes. Oil, chemical and impact resistant. High temperature resistance (-30°C to 65°C). Do not use to repair or bond items that will contact food or drink. Not recommended for bonding rear-view mirrors to car windscreens.

Storage

Should be stored in a dry place at room temperature in the original tubes.

New

Environmentally friendly product formulation plus eco-friendly packaging for easy recycling.
