Automotive Chemicals – Valvoline Professional Series™

Version: VPS4/004

VPS SynPower™ Gasoline Fuel System Cleaner

Valvoline VPS SynPower Gasoline Fuel System Cleaner is proven to quickly clean up power-stealing deposits to improve engine performance and fuel economy.

VPS SynPower Gasoline Fuel System Cleaner restores optimum engine power and performance by cleaning the entire fuel injection system. VPS SynPower Gasoline Fuel System Cleaner reduces combustion chamber deposit, removes carbon deposits, lowers exhaust emissions, reduces engine hesitation, surging and rough idle as well as removes moisture from the fuel system.

Applications

Deposits are the result of combustion and need to be removed regularly. One bottle of VPS SynPower Gasoline Fuel System Cleaner treats up to 75 liters of petrol and should be used at least during every service to ensure that the engine keeps performing at its best.

VPS SynPower Gasoline Fuel System Cleaner cleans carburetors, fuel injectors, intake valves, intake runners and ports, cylinder heads and piston crowns.

VPS SynPower Gasoline Fuel System Cleaner will not harm catalytic converters and particulate filters or oxygen sensors and contains no alcohol.

Easy to use:

Add VPS SynPower Gasoline Fuel System Cleaner to the fuel tank before refilling. The content of the bottle of 350 ml. is enough for 1 passenger car fuel tank. To help maintain peak performance use the product every 5.000 kilometers.

Features and Benefits

Restores optimum engine power and performance

Modern engines have become more technically advanced and more precisely engineered. Even a small amount of carbon deposit (unburnt fuel) can "throw off" an engine, leading to reduced performance and fuel economy. VPS SynPower Gasoline Fuel System Cleaner is proven to quickly clean up power-stealing deposits.

Safe for use in modern engines

Today's sophisticated; computer-controlled engines have to remain clean to operate at peak performance. VPS SynPower Gasoline Fuel System Cleaner is highly concentrated and use component targeting, generation V synthetic cleaners to eliminate power-stealing deposits in the fuel system. Older technology fuel cleaners may actually increase deposits in modern engines.

Increased fuel economy and lower emissions

VPS SynPower Gasoline Fuel System Cleaner restores fuel efficiency and lowers harmful emissions.

Peak performance with just one treatment

Deposits in the fuel system can cause reduced power, increased emissions, knock and ping, hesitation, lost horsepower, poor fuel economy, and require the use of higher octane gasoline.

VPS SynPower Gasoline Fuel System Cleaner helps restore the fuel system to its peak performance with just one treatment and may allow the use of lower octane gasoline.

Deposit control

VPS SynPower Gasoline Fuel System Cleaner contains powerful synthetic cleaners designed specifically to remove deposits normally formed in fuel systems. Keeps your car running like new, just use Valvoline VPS SynPower Gasoline Fuel System Cleaner every 5.000 kilometers.

Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. A Material and Safety Data Sheet (MSDS) is available on request via your local sales office or via the internet @ <http://msds.ashland.com>

Protect the Environment

Take used chemicals to an authorized collection point. Do not discharge into drains, soil or water.

Typical Properties

Typical property characteristics are based on current production. Whilst future production will conform to Valvoline specifications, variations in these characteristics may occur.

VPS SynPower Gasoline Fuel System Cleaner	
Appearance	Clear liquid
Colour	Bright & clear
Flashpoint PMCC	82°C.
Specific Gravity @ 15°C.	0.863
Storage	Cool & dry
